

► What is the Skills for Life Agenda?

A national strategy that is in place to upskill the workforce and ensure that employees have the opportunity to develop their essential skills in literacy, language and numeracy to a level that helps them function effectively at work.

How would your business benefit?

The potential benefits of training your staff:-

- Improved performance and quality assurance
- Improved communication
- Improved retention
- Realising existing potential
- Increased profits
- Fit for purpose staff
- Increased staff morale

How can we do this?

- Identify employees' skills gaps
- Plug these gaps by improving number data handling, written and spoken communication skills
- Deliver short courses (minimum 10 glh) relevant to your organisation's needs
- Train small groups of employees or individuals - in your workplace

We are very keen to work with you in supporting employees to develop their essential skills in Maths and English.

► Take the Test!

We offer the national tests for adults in Maths and English at Level 1 and Level 2, which are recognised qualifications equivalent to GCSE level. These qualifications will boost skills, build confidence and improve your employees' performance.

Employees will be able to develop the skills needed to pass the tests within the workplace studying at their own level and pace with quality teaching and tutor support.
